

PRESS RELEASE

DataSync and VNC Reach Agreement for Exclusive DataSync Suite Distribution Rights in Europe/Middle East

SIOUX FALLS, SD – BAAR, SWITZERLAND October 20, 2009 – DataSync, a leading provider of integrated small business software-as-a-service (SaaS) solutions, has reached agreement with Virtual Network Consult GmbH (VNC), that provides VNC exclusive distribution rights of DataSync Suite® in Europe and the Middle East.

DataSync is the developer of DataSync Suite™, a small business software platform that integrates core business applications including SugarCRM® Pro (sales/customer service), Zimbra® (mail/calendaring), Quickbooks® (accounting), and Drupal® (website management) into a software-as-a-service web portal. DataSync Suite provides a single user sign-on, data syncing between applications, and a user administration console, all at a cost-effective cloud-based service.

DataSync and VNC will immediately begin to jointly market DataSync Suite, while leveraging each other's expertise in their respective marketplaces. Craig Anderson, Chairman of DataSync stated, "We are extremely pleased to have reached agreement with VNC. This agreement will accelerate our entry into the European and Middle Eastern markets. VNC's strengths become our strengths, which we are quite excited about."

VNC is an innovative Value Added Distributor in the EMEA markets. Andrea Wörrlein, CEO of VNC stated, "We are very excited about promoting DataSync Suite to our channel partners and their customers in the European and Middle Eastern markets. We are convinced that DataSync Suite is a perfect fit for SMB customers in our target area and will experience tremendous growth in the near future."

With SugarCRM Pro at its core, DataSync Suite™ helps small businesses focus on their customers by connecting email, contacts, calendars, accounting software, and websites into a central Customer Relationship Management (CRM) system. The software eliminates dual-entry, simplifies order processing, and automates sales processes. DataSync's entire software suite is a cloud-based service that is accessible from any web browser, mobile device, and can be connected to desktop applications such as Microsoft Outlook.

DataSync and VNC, will combine marketing activities to bring a consolidated small business software application to Europe and the Middle East.

About DataSync

DataSync Corporation was launched in 2005, and is focused on delivering open source small business consolidation software. In 2009, DataSync released its flagship product, DataSync Suite,[™] to a large audience of developers and businesses. The company now has thousands of users around the world, and has built a global partner network providing services and solutions based on DataSync Suite.[™]
